PROFESSIONAL SUMMARY

- Frontend Developer with extensive experience in developing user-friendly, adaptive, and responsive websites with optimized cross-browser compatibility and runtime performance.
- Expertise in Python, React.js and Angular as well as other resources to accomplish design requirements.
- Automated front-end unit and functional tests to ensure seamless updates and deployments with client-side scripting techniques, security protocols and version control.
- Outstanding Knowledge of HTML5, CSS3, SCSS, JavaScript, DOM manipulation, PHP, responsive design techniques
- Strong PHP template engine experience, such as with Twig; familiarity with package managers and task runners, such as Webpack, Grunt, Bower and Yarn, as well as Well-versed in technical SEO and source code management platforms like GitHub and Git
- Abreast on new developments in the field, market trends, and best practices for UX design and UI development.

WORK EXPERIENCE

Front End Web Developer Engineer, Code embassy, Rajkot   January 2020- June 2023

- Developed and implemented a new front-end architecture using React.js, resulting in a 25% increase in page load speed and a 15% increase in user engagement.
- Utilized front-end technologies such as jQuery and AJAX to integrate with back-end services, resulting in real-time data-driven updates to the website and an improved user experience.
- Developed and tested interfaces, page layouts, and optimized graphics, images, and motion graphics while ensuring compliance with cross-browser compatibility and Web Standards guidelines.
- Leveraged agile methodology to automate tasks and maintain code quality while developing web-frontend logic with HTML, JavaScript, and CSS.
- Spearheaded the successful refactoring of the client-side web architecture to introduce a reliable SPA (Single Page Application).
- Developed 10+ interactive web applications using advanced JavaScript libraries and APIs.
